Global Sustainable Enterprise System

The global standard for comprehensive sustainability assessment & certification
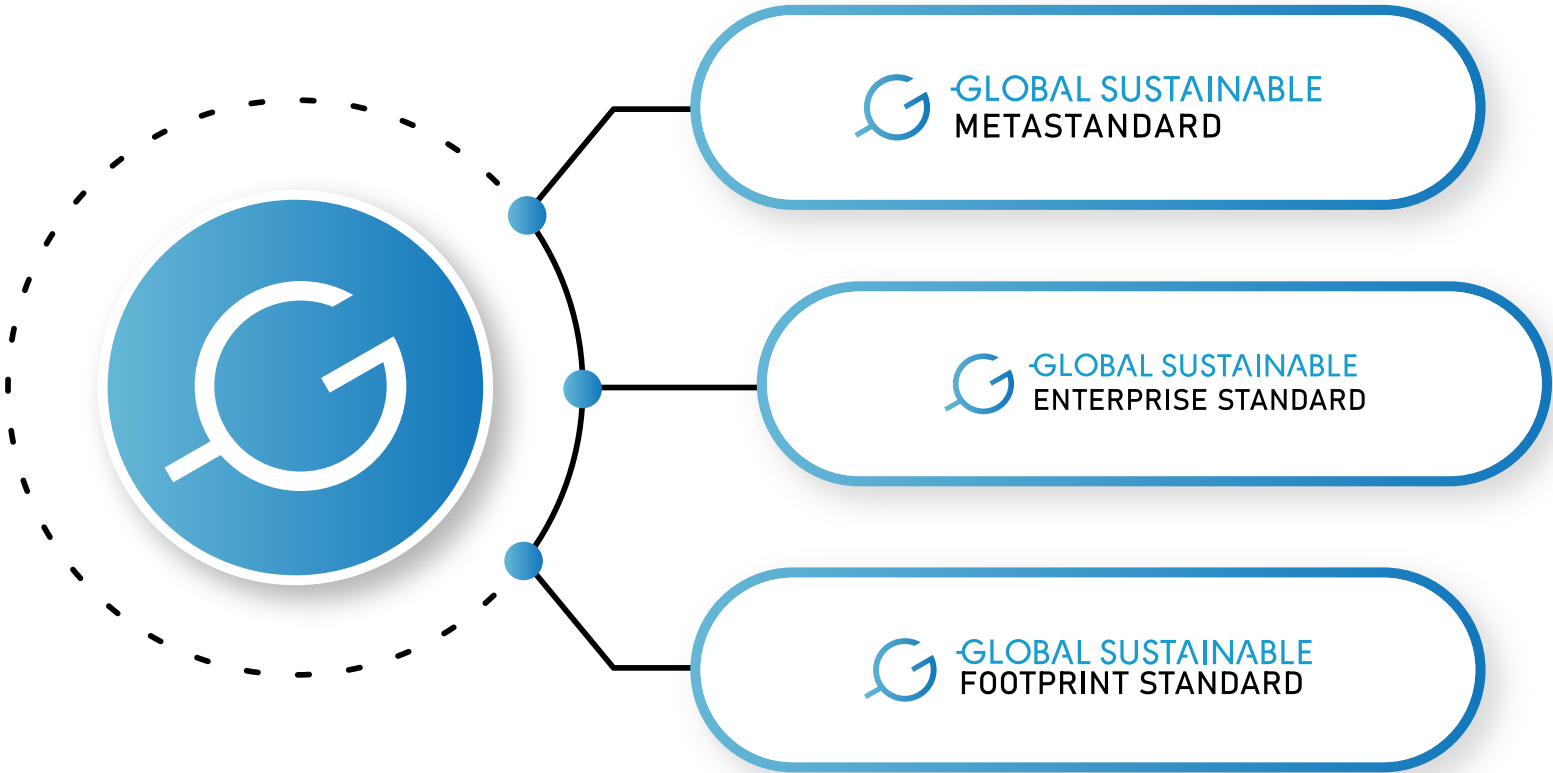

Meet the Global Sustainable Enterprise System (GSES®).

A recognized platform that helps you rate, verify and certify your sustainability performance on process, supply chain, and product level. No more confusion due to an overload of complex information and regulations. Our system easily and cost-effectively aligns over 50 ecolabels and sustainable certificates. Our System uses worldwide accepted standards to holistically measurements of your sustainability performance.

- Organisation
- Supply chain
- Products
- Assets
- Taxonomy & Investment rating

The Global Sustainable Enterprise (GSE-) System provides a Triple solution

The GSES System alignes certificates and labels into one rating system the GSES Meta Standard

Hammam Towel

GSES SUSTAINABLE PRODUCT FOOTPRINT

Oxious BV
Brand / Supplier

Hammam Towel

Oxious has a wide range of high-quality hammam towels, made with a positive impact on people and the environment. For example, we developed our own hammam towels, which consist of 50% recycled materials. They are produced in our own production company in Turkey. We work with women there in a social context, where there is room for growth and development.

kiwa

Organization Level

Organizational rating process for organizations and their suppliers or vendors

2. GET VERIFIED

Your certificates are verified on the standard level which gives you points on your ESG-Rating on the organization level.

4. REQUEST VERIFICATION

Request verification (desk review / external audit) by an independent audit institution from the GSES Network

1. UPLOAD CERTIFICATES

Upload certificates you already have in the metastandard functionality.

3. ONLINE ASSESSMENTS

Become a full member and do the online assessments to get higher ratings.

5. YOUR RATING

The ESG-Rating card of your organization is published in the freely accessible database of the GSES System.

Product & Project Level

**Product & project rating process for products suppliers, webshops and product buyers**

1. REGISTER PRODUCT (OR PROJECT)

Inserting your product credentials or upload your LCA on the GSES System.

2. UNVERIFIED PRODUCT RATING

Your unverified Product Rating is published in the freely accessible database on the GSES System.

3. CHOOSE YOUR PILLARS

Choose your pillars you want to improve; Circular and/or Environmental and/or Health.

4. UPLOAD EVIDENCE

Upload your evidence in your virtual safe on the GSES Platform

5. VERIFY YOUR CLAIMS

Request product verification (desk review / external audit) by an independent audit institution connected to the GSES Network.

6. VERIFIED PRODUCT RATING PUBLISHES

The rating card of your product(s) is published in the freely accessible databases of the GSES System.

the Netherlands Pavilion
GSES SUSTAINABLE FOOTPRINT

Country pavilion on Wolrd Expo 2020 Dubai
the Netherlands Pavilion
Expo Dubai 2020

4.5 Planets
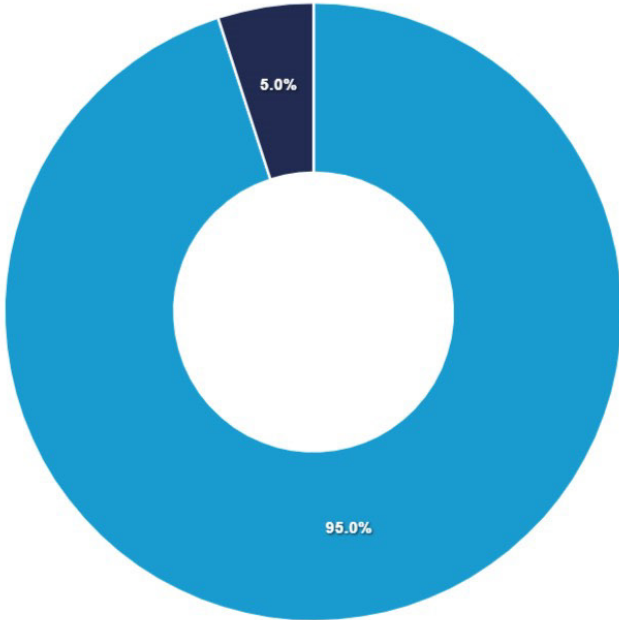

The Netherlands pavilion showcase innovative answers to global issues like water scarcity, food security and the energy transition. For example, they will extract water from the desert air to create an indoor climate where they can grow food products such as mushrooms. They will also be generating our own energy. In our biotope these solutions are presented on a small scale, but they have the potential to be developed on a larger scale.

Besides creating a circular system in the biotope, the Netherlands pavilion also aims to keep the pavilion's ecological footprint as small as possible. All the pavilions on the Expo grounds are temporary. So the design team opted for a circular design, in which recycling and reusing materials is key. Furthermore, where possible we have opted to use local materials, reducing the need for transportation. After the Expo, the building materials will be repurposed or recycled locally. The same goes for the interior of the pavilion: all materials used are either biobased and biodegradable (such as floor tiles made from a combination of fungus and straw) or will be reused elsewhere.

Circular Footprint 95%
